PREFACE.

THIS Catalogue of books in the General, the Graves, the Morris, and the Ward Libraries of University College, London, has been compiled and digested from the manuscript catalogues of those collections. For the three volumes in which it is now published the College is indebted to the generosity of one of its oldest friends, Mr. Samuel Sharpe. At Mr. Sharpe's sole cost a thousand copies have been printed.

The Catalogue was begun and carefully carried through the first volume by Mr. Wheeler, the College Librarian, in the midst of other duties, upon a plan which could not be continued without long delay and the production of five volumes instead of three. In the second and third volumes, therefore, Mr. Joseph Gostwick, who was intrusted with their compilation, has judiciously abridged the titles, and by this means, with help of a convenient change in the manner of printing, there has been gain of space without loss of efficiency.

Of the Libraries here catalogued, the General Library is that of which the formation was begun immediately after the foundation of the College, and which has since been maintained by gifts, often of large collections, and by annual purchases. The South Library contains the Graves, Morris, and Ward Collections.

The Graves Library is a most valuable collection of more than ten thousand books and about half as many pamphlets. Mr. J. T. Graves, M.A., who was Professor of Jurisprudence in the College between the years 1838 and 1843, by his will, dated March 26, 1870, devised "all his Mathematical, Astronomical, and Physical books and papers to University College, London, in remembrance of his former connexion with that institution." Perhaps no private scholar has ever formed a Mathematical Library so nearly complete. Many of the books are very rare, some probably unique, and about one half of the whole collection is in handsome bindings.

The Morris Library was bequeathed to the College by Mr. James

Morris, formerly a Professor in the Royal College of Mauritius, who died in February 1869. It is a collection of 8000 or 9000 volumes, well chosen and well preserved, illustrating ancient and modern Classical Literature, Philosophy, and Science generally. Many of the books in this Library also are finely bound.

The Ward Library is a collection of 700 volumes, relating to the History and Antiquities of London, received in 1867 by bequest of Captain Henry Ward, of London.

Among the books here catalogued as part of the General Library, for which the College is greatly indebted to the gifts of friends, are the following collections, of which some have separate MS. Catalogues, and all are provided with distinctive book plates:—

1. The Bentham Collection, a large part of the library of Jeremy Bentham, bequeathed by him to the College, with a further portion bequeathed by him to Edwin Chadwick, Esq., C.B., and since added by Mr. Chadwick to the collection in the College.

2. The Bentham-Mill Collection, being the Library of James Bentham Mill, Esq., which consists of works in General Literature and Science, presented to the College, after his death in 1862, by his sister and executrix, Miss Harriet Isabella Mill, in compliance with his desire.

3. The Ricardo Collection, of works on Political Economy, presented by a Society of Subscribers to Lectures on Political Economy.

4. The Blackburne Collection, the Law Library of William Blackburne, Esq., of Lincoln's Inn, presented to the College, after his death in 1849, by his sister, Miss Eleonora Blackburne.

5. The Holme Collection, the Library of Edward Holme, M.D., of Manchester, received by the College after his death in 1847, as part of his residuary estate. Dr. Holme's medical books will be included in a catalogue of the Medical Libraries of University College. The books relating to Literature, Antiquities, and the Fine Arts are included in this General Catalogue.

6. The Littler Collection, of more than two thousand Theological works, formerly belonging to the Rev. Robert Littler, and presented to the College by his son, R. M. D. Littler, Esq., Q.C., a former student.

7. The Daulby-Roscoe Collection of Icelandic Literature. This consists of about a hundred volumes collected during a residence in Iceland by Mr. John Daulby, a nephew of the historian Roscoe, and includes presentation volumes from Thorkelin and other Norse scholars. The collection passed by bequest to William Caldwell Roscoe, a former student of the College, after whose death it was presented to University College by his widow.

An Appendix to this Catalogue includes books which had been acci-

dentally omitted from the larger list, books bought for or given to the General Library since 1878–79, and also

8. The Chinese Library, an extensive collection of Chinese books formed by the Rev. Dr. Morrison during his residence in China. Of this Library a careful MS. Catalogue has been completed by Professor Douglas, of King's College, which represents the titles of the books in English characters.

A Supplement will hereafter be published including later purchases, and the books in the following collections not yet catalogued :—

1. Many books of general literature, chiefly illustrating the languages of Northern Europe, which formed part of the Library bequeathed by Dr. Grant.

2. The Quain Collection, being the Law Library of the late Mr. Justice Quain, presented in 1876 by Richard Quain, Esq., F.R.S.

3. Various works, especially on Archæology, presented or bequeathed by the late James Yates, Esq., F.S.A.

4. The Barlow Collection of works illustrating Italian literature, and especially the study of Dante, received in 1877 by bequest of Henry Clark Barlow, M.D., who left also an endowment for annual free lectures upon Dante in University College.

5. The Fine-Art Library, which has been in course of formation since the establishment of the Slade School in 1872. Most of the Fine-Art books have been bought with part of the balance of the Edwin Field Memorial Fund; but a considerable number were received from the late Mrs. Grote, and other friends of the College.

The College Libraries which are not represented in this plan are the Medical Library, and the valuable collection of several thousands of books illustrating the study of Anatomy and Physiology, which were presented to the College in 1873 by one of the most eminent of its teachers, Dr. William Sharpey, lately Secretary of the Royal Society, who held in University College the Professorship of Physiology from 1835 to 1874.

In 1877 the Medical Library was enriched by Richard Quain, Esq., F.R.S., Emeritus Professor of Clinical Surgery in University College, who gave from his own Library a selection of 383 Medical works which were not already possessed by the College.

The Sharpey Library and the collection of books on Zoology and Comparative Anatomy, forming part of the Library bequeathed by the late Dr. Grant, who was Professor of Comparative Anatomy from the date of the opening of the College until 1874, will form an important part of a printed Catalogue of the Medical Libraries in University College, London, which has still to be prepared.

When that has been produced, there will be no catalogue left unprinted.

Supply of books to the College Libraries is now maintained by donations from the British Museum and from the Learned Societies, of which a list is added to this Preface, by gifts also from many friends of the College, and by expenditure of about £300 a year derived as follows :—

1. The Ricardo Fund, founded on a donation in 1829 by subscribers to the Ricardo Lectures, "to be devoted to the purchase and maintenance of a Library of Political Economy in the London University" [now University College, London], "to be called the Ricardo Library."

2. The Peene Fund, originating in a bequest by Dr. J. Peene in 1853, "the interest to be annually applied to the purchase of books, chiefly of foreign literature and science, to augment the Library." This bequest, yielding about £50 a year, was for many years the fund upon which the General Library chiefly depended for increase.

3. The Crabb-Robinson Fund, established in 1858, part of which may be applied to the purchase of books, engravings, drawings, and works of art, which may advance the study of the Fine Arts in University College, and promote any of the Sciences connected therewith.

4. The Grant Fund, bequest of the late Professor Grant in 1875, "the annual proceeds of which shall be devoted to maintaining and extending the Zoological and Zootomical departments of the Library."

The rest of the money spent in purchasing books is derived from an annual grant by the Council.

This printed catalogue, for which the Council and the Senate of the College heartily thank Mr. Samuel Sharpe, will substantially contribute to the right use of the Library funds. It will not only tell students what books are within reach; it will show also to those who have charge of or otherwise care for the College Libraries, where books are wanting that should be supplied, and thus help any endeavour towards making them a fair representation of the universe of thought.
